Deutsche Windtechnik: Hendrik Böschen is joining the management team as an authorised representative

In January 2018, there will be a personnel change in the executive management of the international full-service provider Deutsche Windtechnik AG: Hendrik Böschen, who previously served as Managing Director of Senvion Deutschland GmbH, will help drive Deutsche Windtechnik's continuing internationalisation forward as a new authorised representative alongside Matthias Brandt.

Deutsche Windtechnik is experiencing strong demand from medium and large plant operators who are looking to optimise maintenance at their wind farms together with Deutsche Windtechnik. This often includes international scenarios. "The increasing competitive pressure and our simultaneous growth make it very important to continue working on our efficiency. We have achieved this quite well so far. Any reinforcement is welcome, and Hendrik Böschen is most certainly a reinforcement," Matthias Brandt emphasised.

Hendrik Böschen has many years of experience in the wind and automotive industries, particularly in international sales and in the structuring of companies. "At Deutsche Windtechnik, Hendrik Böschen will drive processes forward that have already been initialised in the areas of key account management and tender processing. Together with him, we intend to further increase our synergies and refine our knowledge management," Matthias Brandt added.

About Deutsche Windtechnik AG

Bremen-based Deutsche Windtechnik AG offers a Europe-wide single-source full technical maintenance package for wind turbines. The company operates both onshore and offshore. More than 3,000 wind turbines are serviced by approximately 1,000 employees throughout Europe as part of permanent maintenance contracts (basic and full maintenance onshore). Its system engineering focuses on Vestas/NEG Micon, Siemens/AN Bonus, Nordex, Senvion, Fuhrländer and Gamesa turbines.
