Deutsche Windtechnik is cooperating with MEAG in Sweden and has signed a full service contract for six Siemens SWT-2.3-101 wind turbines

From now on, the independent service provider Deutsche Windtechnik will not only provide maintenance in Scandinavia for wind turbines from the manufacturers Vestas and Gamesa but also for wind turbines made by Siemens: The Swedish subsidiary has signed a full service contract for six Siemens SWT-2.3-101 wind turbines managed by MEAG. The term of the contract is fifteen years. Deutsche Windtechnik and MEAG have already worked together successfully in Germany for a number of years in the field of maintenance for several wind turbines.

Deutsche Windtechnik will now establish a new service station with local service technicians for Siemens wind turbines near the wind farms. "This contract provides a perfect foundation for growth in this geographic area. We see significant opportunities for our local subsidiary," Linus Sturesson, Managing Director of Deutsche Windtechnik AB in Sweden, said.

About Deutsche Windtechnik AG

Bremen-based Deutsche Windtechnik AG offers a Europe-wide single-source full technical maintenance package for wind turbines. The company operates both onshore and offshore. More than 3,000 wind turbines are serviced by approximately 1,000 employees throughout Europe as part of permanent maintenance contracts (basic and full maintenance onshore). Its system engineering focuses on Vestas/NEG Micon, Siemens/AN Bonus, Nordex, Senvion, Fuhrländer and Gamesa turbines.
