ELA Press Release

— ELA Container Offshore delivers Offshore Living Quarters to Jumbo “Fairplayer”

ELA Container Offshore GmbH has recently delivered two ELA Offshore Living Quarters, Type Allrounder, to Jumbo Offshore. The TLQs were installed on board their Construction Support Vessel MV Fairplayer.

Jumbo is a heavy lift shipping and offshore transportation & installation contractor from the Netherlands and has been developing pioneering solutions for ocean transportation for more than 50 years. Since 2003, building on their heavy lift capability, Jumbo rapidly established a sound track record in the offshore subsea installation market. Today they operate versatile and in-house designed heavy lift vessels with a lifting capacity from 650t up to 3,000t.

The ELA Offshore Living Quarters will be used by Jumbo during the offshore transportation and installation of the 60 transition pieces for a Windfarm. "Jumbo was looking for extra sleeping accommodation on short notice for their client and available deck space was limited. As we always keep containers in stock we were able to deliver instantly", says Frank ter Haak, Business Development Netherlands and Belgium at ELA Container Offshore GmbH.

Offshore Construction Manager, Mr. van der Meer: "I have seen the ELA Living Quarters on the Offshore Energy Exhibition in Amsterdam in October and I was impressed by the possibilities of their modular system and the high quality finish. Also their 20ft ISO dimensions will save us a lot of valuable deck space".

ELA Container Offshore has already gained diverse experience in the Offshore-Wind and Offshore Oil & Gas Industry. Whether on pontoons, transformer platforms, rigs or supply vessels - ELA Container is the ideal partner, offering tailor-made concepts for all requirements in the form of Living Quarters, Offices, Dining Rooms, Galleys, Laundries, Recreation or Locker Rooms and all types of Carrying Units. ELA Offshore containers are equipped with all the necessary utilities. This guarantees, in combination with all ELA Offshore features, a long service life, functionality and comfort.

The high quality Containers are "Made in Germany" according to German quality standards and possess all necessary certifications such as DNV 2.7-1 / EN 12079-1, DNV 2.7-2, based on SOLAS, IMO FSS Code and MLC as well as CSC and are approved from several IACS-companies. In terms of fire resistance, an A60 insulation provides high safety standards. Every container will be checked before delivery. Depending on customer requirements, ELA Offshore Containers are individually customized, immediately operational and are available at short notice.

The main features of ELA offshore accommodations include:

- Flexibility on demand
- One base type with various accommodation solutions
- Easy handling thanks to standard 20ft High-Cube ISO standard dimensions
- Highest quality standards

The ELA Container Offshore GmbH is part of the Albers Group. ELA Container GmbH is a family-owned company in northern Germany and has been continuously developing container technology providing the rent and sale of high quality mobile rooms and containers since 1972. Currently, the company has leased out more than 23,000 mobile units throughout Europe, Africa and the Middle East. ELA's own fleet of 60 special trucks with loading cranes ensures safe transport and installation on site. Offices throughout Germany provide fast deliveries on short notice to any location.

The ELA Offshore Living Quarters were installed on board MV Fairplayer.

The Jumbo MV Fairplayer is a Construction Support vessel from their J-1800 class, equipped with a DP2 system and a dual crane lifting capacity of 1,800t, enabling to provide transport in combination with offshore installation services.
