Press Release: 30 November 2022

MASS TANK and STEEL INSPECT complete a Memorandum of Understanding (MOU) for quality management and NDT services to become the pioneer quality service provider in the United States offshore wind energy sector

MASS TANK and STEEL INSPECT have signed a Memorandum of Understanding (MOU) for the delivery of professional management and service contracts relating to quality management systems and onshore and offshore monitoring and construction supervision for the north American offshore wind energy sector.

This agreement shows a strategic commitment in working to provide full quality service to the offshore wind energy sector in the USA.

Carl Horstmann, CEO and Kevin Halligan, Jr., Managing Director of MASS TANK says “MASS TANK is very pleased to make this strategic agreement with Steel Inspect. This partnership combines the expertise of STEEL INSPECT’s broad experience in quality control services in the offshore wind sector and the in-depth experience of MASS TANK when it comes to NDT services and over 100 years’ experience in the steel fabrication industry. The combination creates a strong player for all quality control services for the US offshore wind market.”
