WAB brings German wind energy expertise to India: German Pavilion at windergy India 2026

Joint stand featuring ten exhibitors from 7 to 9 October 2026 in Chennai

Bremerhaven/ Chennai, 07.10.2026 – From 7 to 9 October 2026, the Wind and Hydrogen Industry Association (WAB e.V.), in collaboration with the Federal Ministry for Economic Affairs and Energy (BMWE) and the AHK India – Indo-German Chamber of Commerce, will be presenting the German Pavilion at windergy India 2026 in Chennai. At the joint stand H1 – P1403, ten exhibitors will showcase their expertise, products and services, thereby providing an insight into the German wind energy value chain.

“India is an important market for the international wind industry, with great potential for development. With the German Pavilion, we are creating a platform where companies from the German wind industry can showcase their expertise, forge new contacts and strengthen existing partnerships. Cross-border exchange and strong partnerships along the value chain are of particular importance for an internationally oriented sector. We are therefore very much looking forward to windergy India and would like to thank the BMWE and the AHK India for their excellent cooperation,” says Markus Nölke, Managing Director of WAB e.V.

windergy India also builds on the already intensified exchange between the WAB and stakeholders from India. Indian delegations were guests both at the German Pavilion at WindEurope in Madrid in April 2026 and at the WAB joint stand at WindEnergy Hamburg in September 2026. In Chennai, this exchange will now continue on the ground and be further deepened.

India offers considerable potential for development, particularly in the offshore wind sector. According to the Indian Ministry of New and Renewable Energy (MNRE), the offshore wind potential off the coast of Tamil Nadu is estimated at around 35 GW, with a further 36 GW off the coast of Gujarat. Through various support schemes and tendering models, India is currently laying the foundations for the development of its own offshore wind market. This is also creating new opportunities for international cooperation and for companies across the entire value chain.

windergy India will take place for the eighth time in 2026. Since its debut in 2012, it has established itself as the leading trade fair and conference for the Indian wind energy sector. As the only Indian trade fair dedicated exclusively to wind energy, it brings together companies, policy-makers, experts and other industry stakeholders from India and numerous other countries. Further information on windergy India can be found here.

Meet the following exhibitors at the ‘German Pavilion’ (Booth H1 – P1403):

Deutsche WindGuard GmbH	SAERTEX INDIA PRIVATE LIMITED
DEWI-OCC GmbH (UL Solutions)	Sfc Energy AG
Germany Trade & Invest (GTAI)	Foundation OFFSHORE Wind Energy
Hamburg Messe und Congress GmbH	WAB e.V.
Harbauer India Private Limited/ Romotioncam	Windcomp GmbH

About WAB e. V.:

WAB is the national point of contact for the offshore wind industry and the onshore network in the north-west, and promotes the production of green hydrogen from wind power. The association comprises around 250 companies of all sizes, as well as institutes from all sectors of the wind industry, the maritime industry, the emerging hydrogen economy and the research sector. Through our members, we represent around 160,000 skilled workers. As the voice of the value chain, the Wind Industry and Hydrogen Association (WAB e.V.) advocates for climate protection through 'green' energy in the form of electrons and molecules.
